

## **Husky has flair!** *and vision...*

### **Drainvac, always winner!**

We are announcing, with great pride, that the trademark **Husky** has decided to be associated with **Drainvac** for their vacuum systems with an automatic drain range. Wishing to improve their range of central vacuum systems, sucking up both solids and liquids substances, and wanting the best quality, **their choice was easy**. Drainvac invented and was the first to manufacture this type of high end central vacuum system, that can practically do everything!

This is why Drainvac accepted with pleasure this partnership! We will manufacture, for them, different limited models of our Automatik range **under the trademark Husky**, either the **DV/DF1A150 (Pro300)**, **DV/DF2A310 (Pro400)** for residential line, and also the **DV/DF2A31 (Pro500)** and our **booster head** for commercial line. Even though they will be visually different, the models that we will manufacture for the trademark **Husky**, will have a **retail price increased around 10%**.

Our product is of **outstanding quality recognized throughout the world**, and knowing that the competition has already imitated, why swim against the tide? Thus **we restrict copies and maintain our high quality standards**.

## **You will be proud to tell your customers ...**
